

Pest / Disease Identifier

AgriTech & FoodTech

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Identifies the likely pest or disease from described symptoms and suggests integrated management (cultural, biological, chemical with safety/PHI). Use it to name a problem fast. For a full advisory with immediate actions, use the Farm Advisory Report.

Purpose of this tool & output

Identify a likely crop pest or disease from symptoms

How the output is used

Use it to identify a likely crop pest or disease from symptoms and to plan safe control, then confirm locally.

Important cautions

AI-generated advisory from symptoms; confirm with local KVK/agri-officer before spraying.

Companion documents

- Farm Advisory Report
- Fertiliser / Nutrient Plan
- Crop Selection Advisor
- Irrigation Schedule Planner
- Soil-Health Recommendation

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
