

Harvest Collection Strategy

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a collection plan to recover farmer credit at harvest — timing to crop sale, prioritisation, respectful follow-up cadence, incentives and escalation — to convert receivables to cash. Use it to run the collection season. For chronic cases use the Bad-Debt Recovery tool.

Purpose of this tool & output

Recover farmer dues at harvest

How the output is used

Use it to plan harvest-time collection — reminders, timing to the crop sale and a follow-up sequence that recovers dues without losing the farmer.

Important cautions

Collect at the harvest-sale window when farmers have cash — that timing drives recovery. Follow up respectfully and lawfully; never use coercion or unlawful pressure. Reschedule genuine hardship, but do not extend fresh credit before old dues clear.
