

Crop Advisory & Recommendation Builder

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a crop-stage input advisory for a farmer query — likely diagnosis, recommended package (seed treatment, nutrition, protection) with correct products/doses/timing and safety, as an advisory that builds trust. Use it to advise farmers well. For a full season plan use the Package of Practices tool.

Purpose of this tool & output

Give farmers sound crop input advice

How the output is used

Use it to give farmers sound, season-appropriate crop and input advice that builds trust and repeat sales — grounded in crop stage and local conditions.

Important cautions

This is general agronomic guidance to be confirmed by field scouting/soil testing, not a substitute for local expert diagnosis. Recommend only pesticides registered and labelled for the target crop-pest, at label dose, with proper safety and pre-harvest intervals. Avoid overuse and unneeded products.
