

Drone / Spray Service Setup

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a plan to add a drone or mechanised crop-spraying service — regulations and licences, economics, pricing, safety and linking to pesticide sales. Use it to launch a spray service. For the pesticide range use the Crop-Protection Range Planner.

Purpose of this tool & output

Offer drone or mechanised spraying

How the output is used

Use it to offer drone or mechanised spraying as a service — the equipment or operator tie-up, pricing and the safety and approval rules for aerial spraying.

Important cautions

Drone spraying requires DGCA registration, a certified remote pilot and adherence to approved agri-drone SOPs and product labels for aerial application — do not operate without these. Government drone subsidies and rules change; confirm current DGCA/Kisan-drone requirements, subsidy eligibility and approved products before investing.
