

Fertilizer Movement & O-Form Guide

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a guide to fertilizer stock movement and documentation — receiving from source, O-form/source certificates, inter-godown/sub-dealer transfers, e-way bills and records. Use it to move fertilizer compliantly. For subsidy sales use the DBT & PoS Compliance Guide.

Purpose of this tool & output

Move and document fertilizer stock legally

How the output is used

Use it to move and document fertilizer stock legally between godown and shop — the invoices, Form-O trail and iFMS entries that inspections check.

Important cautions

Sell and move only fertilizers for which you hold valid source (O-form) certificates endorsed on your FCO licence, with proper invoices, e-way bills and iFMS acknowledgement. Missing source documentation is a common inspection failure. Confirm current documentation norms with the department.
