

Label-Claim & Recommendation Compliance

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces guidance on staying within approved label claims — recommending pesticides only for registered crop-uses and doses, avoiding off-label/unapproved advice, and the liability of over-claiming. Use it to keep your recommendations legal and safe. For product selection use the Right-Product Recommendation Guide.

Purpose of this tool & output

Sell and recommend within the approved label

How the output is used

Use it to sell and recommend strictly within the approved label — the registered crop, pest and dose only — so off-label advice never lands you in liability.

Important cautions

Recommend and sell pesticides only for the crops, pests and doses on the approved (CIB-registered) label — off-label recommendations risk residue violations, crop damage and liability. Do not make exaggerated efficacy claims. When unsure, check the current registered label and refer to expert advice.
