

Crop-Protection Range Planner

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a crop-protection range plan — the insecticides, fungicides, herbicides, bio-pesticides and PGRs to stock, mapped to the local crop pest/disease calendar and resistance management. Use it to plan agrochemical stock. For safe/legal selling use the Insecticides Act Compliance guide.

Purpose of this tool & output

Stock pesticides mapped to pest calendars

How the output is used

Use it to plan a crop-protection range mapped to your local pest and disease calendar, so the right product is on the shelf when farmers need it.

Important cautions

Stock and recommend only pesticides registered and labelled for the target crop-pest, in appropriate doses, with mode-of-action rotation for resistance. Never stock banned/restricted or misbranded products. Confirm the current registered-label status and banned list.
