

Pesticide Storage & Safety Compliance

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a pesticide storage and safety compliance plan — segregated ventilated secure storage, spill/fire response, PPE, signage and legal storage conditions. Use it to store agrochemicals per the Insecticides Rules. For general godown layout use the Godown Setup Guide.

Purpose of this tool & output

Store agrochemicals safely and legally

How the output is used

Use it to store agrochemicals safely and legally — separate ventilated storage, spill and fire measures, and the storage conditions the licence requires.

Important cautions

The Insecticides Rules require pesticides to be stored separately from food/feed/seed and living areas, ventilated and secured, with spill and fire safety. Never sell loose/repackaged pesticide. Keep emergency/antidote information accessible. Confirm current storage norms with the licensing authority.
