

PoS & iFMS Stock Reconciliation

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a routine to reconcile PoS/iFMS fertilizer stock with physical stock — acknowledging receipts, capturing all sales, finding mismatch causes and fixing them before inspection. Use it to keep DBT stock clean. For the overall DBT rules use the DBT & PoS Compliance Guide.

Purpose of this tool & output

Keep PoS fertilizer stock matching physical

How the output is used

Use it to keep PoS/iFMS fertilizer stock matching your physical stock every day, so subsidy claims are never held up by a mismatch.

Important cautions

PoS/iFMS stock must match physical stock for inspection — the usual drift causes are unacknowledged receipts and unbilled/late-billed sales. Acknowledge arrivals and bill every sale same-day. Confirm current iFMS/mFMS procedures with the department.
