

Seasonal Stocking Strategy

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a seasonal stocking strategy — how to phase kharif/rabi purchases, use company pre-season schemes wisely, and manage the pre-season stocking cash crunch. Use it to buy at the right time and price. For overall inventory levels use the Inventory Planning tool.

Purpose of this tool & output

Time kharif/rabi stocking and scheme buys

How the output is used

Use it to time your kharif and rabi stocking and scheme buys, so you catch early-bird discounts without over-committing before demand is clear.

Important cautions

Pre-season scheme buying saves money only if the stock actually sells before expiry and you can fund the cash lock-up until harvest collections. Buy core fast-movers early; keep reserve capital for peak-season reorders. Match to real catchment demand.
