

Seed Law Compliance Guide

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a seed-selling compliance guide under the Seeds Act and Seeds Control Order — labelled/notified seed only, source certificates, records, display, and misbranding liability. Use it to run seed sales legally. For the seed licence itself use the Seed Dealer Licence Guide.

Purpose of this tool & output

Sell seed within the Seeds Act rules

How the output is used

Use it to sell seed within the Seeds Act rules every day — only labelled, in-date seed from certified sources, with the records and lot traceability required.

Important cautions

Sell only labelled, in-date seed with valid source/principal certificates and keep prescribed records — selling misbranded or substandard seed is an offence and invites germination-failure liability. Genuine source documentation protects you if a company seed lot fails. Confirm current Seeds Act/Control Order requirements.

Companion documents

- Seed Quality Assurance & Storage
- Seed Treatment Advisory & Service
- Seed Labelling & Truthful-Label Compliance
- Seed Replacement & Quality-Seed Promotion
