

Seed Portfolio & Variety Planner

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a seed portfolio plan — which varieties/hybrids per crop to stock for the local agro-climate, balancing performance, farmer demand, company support and margin. Use it to build a winning seed range. For overall assortment use the Product Mix Planner.

Purpose of this tool & output

Choose seed varieties and hybrids to stock

How the output is used

Use it to choose which seed varieties and hybrids to stock for your crops and seasons, balancing farmer demand, company support and margin.

Important cautions

Seed performance depends on local agro-climate and season — favour varieties proven locally and demo new hybrids before pushing volume. A failed variety destroys farmer trust. Sell only labelled, in-date seed with valid source certificates.
