

Seed Replacement & Quality-Seed Promotion

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces an approach to promote higher seed replacement — moving farmers from saved/old seed to fresh certified/quality seed each season, with the yield case and a sales plan. Use it to grow quality-seed sales. For portfolio choice use the Seed Portfolio Planner.

Purpose of this tool & output

Promote fresh certified seed to farmers

How the output is used

Use it to promote fresh certified seed to farmers instead of saved seed — the yield case for a higher seed replacement rate that also grows your seed sales.

Important cautions

Promote fresh quality/certified seed on genuine agronomic merit — hybrids must be bought fresh each season, and saved open-pollinated seed loses vigour/purity over years. Make the honest yield case; do not exaggerate. Sell only labelled, in-date certified/quality seed.
