

Seed Treatment Advisory & Service

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces guidance to advise farmers on seed treatment and to offer it as a value service — products, dose, safety, crop fit and benefits — improving farmer results and dealer margin. Use it to build seed-treatment sales. For the full crop plan use the Package-of-Practices Builder.

Purpose of this tool & output

Advise and offer seed treatment

How the output is used

Use it to advise and offer seed treatment as a value-added service — the right treatment per crop and pest, done safely, that builds farmer results and margin.

Important cautions

Use only products registered for seed treatment at correct per-kg doses, follow the fungicide-insecticide-biofertilizer order, and handle treated seed safely — it is toxic and must never enter food/feed. Advise safe practice. Confirm registered seed-treatment products and doses.
