

Seed Labelling & Truthful-Label Compliance

Agri-Inputs & Farm Supply

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a compliance check on seed labelling — mandatory label particulars, truthful-labelling requirements, validity and traceability — so every seed pack you sell is legally labelled. Use it to avoid misbranding. For overall seed law use the Seed Law Compliance Guide.

Purpose of this tool & output

Ensure seed labels meet legal norms

How the output is used

Use it to ensure seed labels meet the truthful-labelling and Seeds Act norms — the mandatory particulars, dates and germination declaration on every pack you sell.

Important cautions

Seed must be sold in properly and truthfully labelled packs showing germination/purity, lot and validity — selling loose, unlabelled, mislabelled or expired seed is misbranding, an offence. Check each pack before sale and keep lot records. Confirm current labelling requirements under the Seeds Act/Control Order.
