

Charter Operations SOP

Aviation & Air Services

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces an operations SOP for charter flying — flight request to dispatch, planning, crew and duty, ground and turnaround, safety and records — for consistent, compliant operations. Use it to run charter operations to standard.

Purpose of this tool & output

Run charter flights safely and legally

How the output is used

Use it as the operating SOP for charter flights — booking, dispatch, crew, safety and turnaround run the same way every flight.

Important cautions

Operations must follow your DGCA-accepted operations manual and CARs including flight-duty-time limits; this is a template, not the approved manual. Align all procedures with your accepted manuals and current CARs.
