

Charter Operation Setup Guide

Aviation & Air Services

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a setup plan for a non-scheduled charter or air-taxi operation — fleet, permit, base, crew, maintenance and commercial setup — to launch flying. Use it as the playbook to build a charter business.

Purpose of this tool & output

Set up a charter / air-taxi operation

How the output is used

Use it to set up a charter or air-taxi operation — the fleet, permit, crew and commercial model needed to fly paying passengers.

Important cautions

Charter setup is capital-heavy and gated by the operator-permit certification which takes many months; utilisation drives viability. Confirm the permit process with DGCA and budget for approval lead time and low early utilisation.
