

Ground Handling Operations SOP

Aviation & Air Services

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces an operations SOP for ground handling — arrival to departure turnaround, ramp safety, passenger and baggage and load control — for safe, on-time handling. Use it to run ground operations to standard.

Purpose of this tool & output

Run ramp and passenger handling safely

How the output is used

Use it as the SOP for ramp and passenger handling — marshalling, loading, pushback and turnaround done safely and on time.

Important cautions

Ramp operations are high-risk (aircraft damage, injury) and governed by airport and airline and DGCA and BCAS rules; this is a template, not the approved manual. Align with the airport and airline procedures and your safety programme.
