

Remote Pilot Training Org (RPTO) Setup

Aviation & Air Services

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a setup plan for a remote-pilot training organisation (RPTO) — authorisation, site, drones, instructors, curriculum and certification — to train and certify drone pilots. Use it to establish an RPTO.

Purpose of this tool & output

Set up a DGCA-authorised drone school

How the output is used

Use it to set up a DGCA-authorised Remote Pilot Training Organisation (RPTO) — the drones, instructors, syllabus and site to certify remote pilots.

Important cautions

RPTO authorisation, syllabus and certification rules are set by DGCA and evolve; the remote-pilot certificate must follow the current process. Confirm the requirements on Digital Sky and with DGCA before setting up.
