

Aviation Sustainability & SAF Guide

Aviation & Air Services

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains aviation sustainability — emissions, sustainable aviation fuel (SAF), efficiency, offsets and reporting and the coming mandates — so an operator can prepare. Use it to build a practical sustainability approach.

Purpose of this tool & output

Plan for sustainability and emissions

How the output is used

Use it to plan for sustainability and emissions — SAF, efficiency and reporting steps that prepare the operation for tightening climate norms.

Important cautions

SAF, emissions mandates and reporting frameworks are evolving and SAF is currently costly and limited in India; avoid greenwashing. Confirm current mandates and frameworks and prioritise real efficiency gains and honest reporting.
