

Attendance & Payroll System

Building Materials & Hardware

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs an attendance and payroll system covering fixed staff and variable loaders/daily-wage workers — attendance capture, wage computation (monthly + per-trip loading), advances, statutory deductions and payslips — so payroll is accurate and disputes fall. Use it to run payroll. For statutory duties use the Labour & Statutory Compliance guide.

Purpose of this tool & output

Track attendance and pay staff and loaders right

How the output is used

Use it to track attendance and pay staff and loaders right — a simple system for hours, wages, advances and statutory deductions.

Important cautions

Reconcile loader advances against wages and give payslips; formalising pay and ESI protects both the worker (injury cover) and you.
