

# Environmental Compliance (RMC / Sand / Dust)

Building Materials & Hardware

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Explains environmental compliance relevant to building materials — pollution-control consent for RMC/batching plants, legal sand/aggregate sourcing and transit permits, and dust/noise control at godowns — so you avoid environmental penalties and closures. Use it if you run RMC or handle sand/dust-heavy materials. For licensing use the Trade Licensing & Registrations tool.

## Purpose of this tool & output

Handle pollution, sand and dust rules

## How the output is used

Use it to handle pollution, sand and dust rules — the environmental compliance a materials, RMC or sand operation must follow.

## Important cautions

Illegal sand and un-consented RMC plants attract heavy penalties and closures; source sand legally with transit passes and get pollution consent before operating. Confirm current SPCB requirements.
