

Legal Metrology & Weight Compliance

Building Materials & Hardware

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains Legal Metrology compliance for a building-materials dealer — weighbridge and weighing-instrument verification, packaged-commodity declarations (cement bag net weight, MRP), and short-weight risks in steel/cement — so you avoid weights-and-measures penalties and disputes. Use it for weight/measure compliance. For licensing use the Trade Licensing & Registrations tool.

Purpose of this tool & output

Stay right on weights, packaged declarations and MRP

How the output is used

Use it to stay right on weights, packaged declarations and MRP — the Legal Metrology rules that apply when you sell by weight or in packs.

Important cautions

Use verified/stamped weighing instruments and sell full declared weight; short-weight and unverified-scale penalties are common and avoidable. Confirm current rules with the Legal Metrology department.
