

Paint Selection & Estimation Advisory

Building Materials & Hardware

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a paint advisory — interior/exterior product and finish selection, surface and prep guidance, quantity estimation by area and coats, and putty/primer/attach items — so you advise credibly and sell the full system. Use it for paint counter-selling. For a project use the Material Quantity Estimator.

Purpose of this tool & output

Advise on paint type, finish and quantity

How the output is used

Use it to advise on paint type, finish and quantity — interior or exterior, coats and litres for the area, with the right primer and system.

Important cautions

Coverage varies by surface and dilution; estimate on stated coverage and confirm areas. A proper putty-primer-topcoat system lasts far longer.
