

Project Supply Planning & Scheduling

Building Materials & Hardware

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a project supply plan for a construction site — phasing material supply to construction stages, quantities and delivery schedule, credit exposure control, and coordination with the site — so you win project supply and manage it profitably. Use it for project/builder supply. For the quote use the BOQ-Based Project Quotation tool.

Purpose of this tool & output

Supply a construction project stage by stage

How the output is used

Use it to supply a construction project stage by stage — schedule materials to the build phases so you deliver on time without over-stocking.

Important cautions

Cap credit exposure to a project and tie payments to supply milestones; a stalled project with your material inside becomes a bad debt.

Companion documents

- BOQ-Based Project Quotation
- Project Credit Risk Assessment
- Builder / Developer Tie-Up Plan
- Government / Institutional Tender Supply
