

Dangerous Goods Classification Guide

Chemicals & Process Industry

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get help classifying a chemical for transport — likely UN class/division, packing group, and packaging/labelling implications for road/sea/air — to ship dangerous goods correctly. Describe the chemical below.

Purpose of this tool & output

Classify chemicals for transport

How the output is used

Use it to classify chemicals for transport — the UN class, packing group and labelling so consignments are moved correctly.

Important cautions

AI-generated guidance; formal DG classification requires test data and a competent person - confirm before shipping.
