

Work Permit System (Height/Hot Work)

Construction & Infrastructure

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Set up a work permit system for high-risk activities — the permit types (work at height, hot work, confined space, excavation, lifting, electrical), the permit process (request, hazard check, controls, approval, closure) and the permit content (precautions, PPE, isolation, standby, validity). Fill in your details below.

Purpose of this tool & output

Control high-risk work with permits

How the output is used

Use the permit system to control high-risk work — height, hot work, confined space — with checks and sign-off before it starts.

Important cautions

AI-generated system; implement under a competent safety officer.
