

# Rate Analysis Builder

Construction & Infrastructure

Document type: Financial model / analysis · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Break down an item rate from first principles — material, labour and machinery components with quantities and rates, plus overhead and profit, to a rate per unit. Use it to justify or check rates in a BOQ or tender. Fill in your details below.

## Purpose of this tool & output

Break down item rates from first principles

## How the output is used

Use the item-wise breakdown to justify rates in a bid or claim and to negotiate with vendors from first principles.

## Who should vet it

A quantity surveyor, to confirm labour/material coefficients and overheads for your region.

## Important cautions

AI-generated analysis; use current local material and labour rates.
