

Site Safety Audit

Construction & Infrastructure

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Self-audit site safety before an incident forces you to — checks by area (height and scaffolding, excavation, electrical, machinery and lifting, PPE, welfare, emergency, documentation), a status scorecard and priority fixes. Fill in your details below.

Purpose of this tool & output

Self-audit site safety before an incident

How the output is used

Use the self-audit to find and fix safety gaps before an incident or an authority inspection exposes them.

Who should vet it

A qualified safety officer/consultant, to validate findings and close high-risk gaps.

Important cautions

AI-generated audit; complement with a competent safety officer inspection.

Companion documents

- Construction Safety Plan
- HIRA / Risk Assessment
- Toolbox Talk Generator
- PPE Policy & Matrix
- Incident / Accident Report
- Work Permit System (Height/Hot Work)

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
