

Audit-Readiness Assessment

Crypto & Web3

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Scores your smart-contract audit readiness across code quality, test coverage, documentation, access control, known-issue remediation and scope clarity, with fixes to do before paying for an audit. Use this to prepare; to brief the audit firm use the Audit-Firm Brief.

Purpose of this tool & output

Score your readiness for a security audit

How the output is used

Use the score to see how ready your code is for a security audit and to fix issues before you pay for one.

Who should vet it

A smart-contract security engineer, to confirm the readiness gaps before engaging auditors.

Important cautions

AI-generated assessment; not a security audit; engage a professional audit firm.

Companion documents

- Smart Contract Security Checklist
- Vulnerability Class Explainer
- Test-Coverage Plan
- Audit-Firm Brief

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
