

Smart Contract Security Checklist

Crypto & Web3

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a pre-audit security checklist tailored to your contract — critical vulnerability checks, custom checks for your specific features, audit-readiness gaps and recommended audit firms. Use this before an audit; for a readiness score use the Audit-Readiness Assessment, and to brief auditors use the Audit-Firm Brief. This is not itself an audit.

Purpose of this tool & output

Describe your smart contract and get a pre-audit security checklist

How the output is used

Use the pre-audit checklist to catch common smart-contract issues before you engage a security auditor.

Important cautions

AI-generated security checklist. This is not a security audit. Engage a professional smart contract auditor before deploying any contract holding user funds.
