

Token Distribution Modeller

Crypto & Web3

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Models a token allocation across buckets (team, investors, community, treasury, ecosystem, liquidity, advisors) with percentages, token counts, rationale and sanity checks against market norms. Use this for the distribution table; for the full economic model use the Tokenomics Design Document.

Purpose of this tool & output

Model your token allocation

How the output is used

Use the modeller to plan and stress-test your token allocation across team, investors, community and treasury.

Who should vet it

A tokenomics advisor, to sanity-check the allocation against dilution and incentive alignment.

Important cautions

AI-generated model; not financial/legal advice; align with legal and market norms.
