

Tokenomics Design Document

Crypto & Web3

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a comprehensive tokenomics framework — supply, a full distribution/allocation table with vesting, an emission schedule, utility design and risk flags. Use this for the whole token economic model; for one focused piece use the Token Distribution Modeller, Vesting Schedule Designer or Emission / Inflation Modeller.

Purpose of this tool & output

Describe your project and we design a token distribution and emission framework

How the output is used

Use the design document as the framework for token distribution, emission and utility, then pressure-test it.

Important cautions

AI-generated tokenomics framework. Engage a blockchain economist and securities lawyer. Token distribution may have securities law implications.

Companion documents

- Token Distribution Modeller
- Vesting Schedule Designer
- Emission / Inflation Modeller
- Token Utility Framework
