

Validator Selection Guide

Crypto & Web3

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Gives validator-selection criteria for PoS staking — uptime/performance, commission, slashing history, decentralisation, self-stake and governance — plus a diversification note. Use this to pick validators; for slashing exposure use the Slashing-Risk Analyzer. Not financial advice.

Purpose of this tool & output

Choose validators to stake with

How the output is used

Use the guide to choose validators to stake with on uptime, commission, decentralisation and slashing history.

Who should vet it

A staking specialist, to confirm the validator due-diligence for your network.

Important cautions

AI-generated guide; not financial advice; verify validator data on-chain.

Companion documents
