

Farm Business Plan

Dairy, Poultry & Livestock

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a structured business plan for a dairy/poultry/livestock farm — market, production model, herd/flock plan, financial projections and subsidy linkage — for a bank loan, NABARD subsidy or investor. Use it for funding. For unit economics use the Farm P&L Modeller.

Purpose of this tool & output

Bank- and NABARD-ready farm plan

How the output is used

Use it to raise a bank loan or NABARD-linked finance — a farm plan with herd, yield, financials and scheme support for a lender.

Important cautions

Feed is typically 60-70% of livestock cost and mortality/disease is the biggest risk; model these realistically. Confirm current NABARD/DEDS subsidy terms — they change.
