AISEVAK.IN · FREE GUIDE

Farm Diversification Advisor

Dairy, Poultry & Livestock

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Recommends diversification options for a livestock farm — value-added processing, adding species (poultry/goat/fishery), integrated farming, agri-tourism or manure/biogas — matched to your resources. Use it to add income streams. For value-added product sales use the Value-Added Sales Strategy (D8).

Purpose of this tool & output

Add products or activities to grow income

How the output is used

Use it to add products or activities to grow income — value addition, agri-tourism or new species using what your farm already gives.

Important cautions

Diversify into activities that share your land/feed/labour and spread risk — value-added processing usually gives the fastest margin uplift. Start small and prove each before scaling. Verify any FSSAI/licence needs for new activities.
