

Ghee Production SOP & Costing

Dairy, Poultry & Livestock

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a production SOP plus yield and cost sheet for ghee — cream/butter route, clarification, grade and aroma, packaging and shelf-life, and cost vs price. Use it to make consistent ghee at a known margin. For paneer use the Paneer SOP.

Purpose of this tool & output

Standardise ghee making, yield and cost

How the output is used

Use it to standardise ghee making, yield and cost — the SOP and yield control that keep quality high and cost known.

Important cautions

Ghee yield depends heavily on milk fat; costs are indicative. Meet FSSAI ghee standards (moisture, RM value) and do not adulterate — pure ghee commands premium and repeat trust.
