

Pollution Control Consent Guide

Dairy, Poultry & Livestock

Document type: Licence / statutory filing · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a guide to pollution-control consent (CTE/CTO) for a dairy or poultry unit — whether you need it, category, effluent/waste management, application and conditions. Use it for SPCB compliance on larger units. For overall compliance use the Compliance Roadmap.

Purpose of this tool & output

SPCB consent for dairy/poultry units

How the output is used

Use it to get State Pollution Control Board consent for a dairy or poultry unit — what to prepare so the waste and effluent plan satisfies the Board.

Who receives it

The State Pollution Control Board (Consent to Establish / Consent to Operate).

How to submit / file it

Apply on the state PCB portal with the project, effluent/emission and treatment details; category (red/orange/green) decides scrutiny.

Fees & charges

A fee based on category and project cost; validity and renewal vary by state and category.

Who should vet it

An environmental consultant for category, norms and treatment design.

Important cautions

Applicability and category depend on scale and state SPCB norms, which vary. Larger units generate effluent/odour and typically need consent. Confirm category and requirements with your State Pollution Control Board.
