

# Poultry Feed & FCR Management

Dairy, Poultry & Livestock

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Builds a poultry feeding and FCR (feed conversion ratio) management plan — phase feeding (starter/grower/finisher or layer feed), feed quality and formulation, FCR monitoring, and reducing feed cost/wastage — so you get the best growth/eggs per kg of feed (feed is ~70% of poultry cost). Use it for poultry feeding. For broiler/layer ops use the Poultry Operations tools.

## Purpose of this tool & output

Feed poultry for the best feed conversion

## How the output is used

Use it to feed poultry for the best feed conversion — the ration and management that improve FCR and lower cost per bird.

## Important cautions

Feed is ~70% of poultry cost and FCR is the key metric — feed quality, phase-appropriate nutrition, health, temperature and low wastage all drive it. Small FCR improvements move profit significantly; monitor it closely.
