

Farm Technology & Automation Advisor

Dairy, Poultry & Livestock

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Recommends technology for a dairy/poultry farm — herd/record apps, automatic milking/feeding, sensors/monitoring, environment controls — matched to scale and payback. Use it to modernise sensibly, not chase gadgets. For equipment basics use the Equipment Selection Advisor (D12).

Purpose of this tool & output

Adopt tech that actually pays on your farm

How the output is used

Use it to adopt tech that actually pays on your farm — the automation and software worth adopting at your scale, and how to roll it out.

Important cautions

Start with cheap high-value record and monitoring tools before costly automation — small farms rarely recover heavy automation cost. Buy tech only if it will actually be used and maintained. Costs indicative.
