

Vaccination & Health Calendar

Dairy, Poultry & Livestock

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a vaccination and preventive-health calendar for your livestock — the key vaccines (FMD, HS, BQ for cattle; Newcastle/others for poultry), deworming, and health checks with timing — so you prevent the diseases that cause the biggest losses. Use it to plan herd health. For disease handling use the Common Disease Management tool.

Purpose of this tool & output

Prevent disease with a proper schedule

How the output is used

Use it to prevent disease with a proper schedule — a vaccination and health calendar for the diseases in your area and species.

Important cautions

Vaccination is the cheapest insurance against the diseases (FMD, HS, Newcastle) that cause the biggest livestock losses; follow your vet and regional animal-husbandry-department advice for the exact schedule and vaccines. Combine with biosecurity.
