

Lab Analytics & MIS Dashboard Plan

Diagnostics, Labs & Imaging

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a management dashboard for a diagnostic centre — volume, revenue, TAT, quality, referrers, receivables and utilisation KPIs. Use it to run the business on data. For the P&L itself use the Diagnostic Centre P&L Modeller.

Purpose of this tool & output

Track the numbers that run your lab

How the output is used

Use it to track the numbers that run your lab — a MIS dashboard of volume, TAT, revenue and quality to run on facts.

Important cautions

Track a focused set of metrics that drive decisions rather than a cluttered dashboard. Referrer concentration, receivables ageing and utilisation are especially important for a diagnostics business. Ensure data is accurate at source (mainly the LIS).
