

Diagnostic Centre Business Plan

Diagnostics, Labs & Imaging

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a structured business plan for a diagnostic centre — market, model, test and imaging mix, financials and licences — for a bank loan or investor. Use it for funding. For unit economics use the Diagnostic Centre P&L Modeller.

Purpose of this tool & output

Bank-ready plan for a diagnostic centre

How the output is used

Use it to raise a bank loan or investment — a plan with catchment, test menu, equipment and financials for a diagnostic centre.

Important cautions

Diagnostics is fixed-cost and volume-driven — model realistic ramp-up and capacity utilisation, not just full-load economics. B2B volume comes at lower price and on credit. Confirm all licence and signatory requirements before funding.
