

Collection Centre Setup Guide

Diagnostics, Labs & Imaging

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a setup plan for a sample collection centre — space, phlebotomy, sample handling, cold-chain dispatch to the lab, staff and compliance. Use it to open a collection point. For the network view use the Collection Centre Network Plan.

Purpose of this tool & output

Set up a sample collection centre

How the output is used

Use it to set up a sample collection centre — the space, phlebotomy, cold-chain and tie-up a collection point needs.

Important cautions

A collection centre lives or dies on pre-analytical quality — correct tube, correct temperature and timely transport. Sharps and biomedical waste generated must be handled per BMW rules. Confirm any registration needed for a collection centre in your state.
