

Imaging Services & Modality Plan

Diagnostics, Labs & Imaging

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Plans an imaging service mix — which modalities and studies to offer by demand, capex, licensing and staffing — with a phased rollout. Use it to shape an imaging offering. For the physical build use the Imaging/Radiology Suite Setup.

Purpose of this tool & output

Plan which imaging services to offer

How the output is used

Use it to plan which imaging services to offer — the modalities, demand and approvals to decide your imaging mix.

Important cautions

Match modalities to real referral demand and reporting capacity. X-ray and CT need AERB licensing; ultrasound needs PC-PNDT. Reporting must be by a qualified radiologist (in-house or teleradiology). Validate demand and radiologist access before capex.

Companion documents

- Ultrasound PC-PNDT Compliance SOP
- Radiology Workflow SOP
- Teleradiology Setup Guide
- Radiation Safety (QA/QC) Plan
- Imaging Report Templates
- Screening & Preventive Imaging Program

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
