

Non-conformity & CAPA Log

Diagnostics, Labs & Imaging

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a non-conformity and corrective/preventive-action framework — logging issues, root-cause analysis, corrective and preventive action, and closure tracking. Use it to handle errors systematically. For readiness use the NABL Assessment Readiness Audit.

Purpose of this tool & output

Handle errors with root cause and action

How the output is used

Use it to handle errors with root cause and action — a non-conformity and CAPA log that turns mistakes into lasting fixes.

Important cautions

A CAPA system only works if non-conformities are honestly logged, root causes genuinely found, and actions verified for effectiveness — not closed on paper. Track trends to prevent recurrence. Align with NABL and ISO 15189 requirements.
