

PC-PNDT Compliance Audit

Diagnostics, Labs & Imaging

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Runs a PC-PNDT self-audit — registration, operator eligibility, Form F completeness, notices, machine registration, records and reporting — with a gap list. Use it before an inspection. For the operating SOP use the Ultrasound PC-PNDT Compliance SOP.

Purpose of this tool & output

Self-audit your ultrasound compliance

How the output is used

Use it to self-audit your ultrasound compliance — a check of Form-F, display, records and machine registration before an authority does.

Important cautions

PC-PNDT non-compliance (incomplete Form F, missing notices, late reporting, unregistered use) can lead to suspension, cancellation and prosecution. This self-audit is not a substitute for legal advice — fix gaps immediately and confirm requirements with your District Appropriate Authority.
