

BEE Star Labelling Compliance

Consumer Electronics & Appliances

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains BEE (Bureau of Energy Efficiency) star-labelling compliance — which appliances must carry a valid BEE star label (AC, fridge, etc.), the dealer duty to display and sell labelled products, and using the label in selling — so you comply and sell on efficiency. Use it to check labelling. For selling on efficiency use the Energy-Efficiency (BEE Star) Advisory.

Purpose of this tool & output

Sell appliances with valid energy labels

How the output is used

Use it to sell appliances with valid energy labels — how to ensure BEE star labelling is present and valid on the appliances you stock.

Important cautions

Notified appliances (AC, fridge, etc.) must carry a valid BEE star label; sell only properly-labelled products and use the rating to sell on running-cost. Confirm the current list of BEE-notified appliances and label periods.
