

E-Waste & EPR Compliance

Consumer Electronics & Appliances

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains e-waste and EPR (Extended Producer Responsibility) compliance under the E-Waste Management Rules — dealer/retailer collection and take-back duties, channeling e-waste (and exchange/old goods) to authorised recyclers, records, and awareness — so you handle end-of-life electronics legally. Use it for e-waste compliance. For exchange use the Refurbished & Exchange Program.

Purpose of this tool & output

Meet e-waste collection and EPR duties

How the output is used

Use it to meet e-waste collection and EPR duties — the take-back, records and handover to authorised recyclers an electronics seller must run.

Important cautions

Diverting e-waste to informal scrap dealers is illegal and hazardous; channel end-of-life and exchanged electronics to authorised recyclers/dismantlers and keep records. E-Waste Rules are evolving — confirm current dealer obligations.
