

POS / Inventory Software Selection

Consumer Electronics & Appliances

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Guides selecting POS/inventory/retail software for an electronics business — must-have features (serial/IMEI billing, GST e-invoice, stock, CRM, service/job module, finance/EW), build-vs-buy and cost/adoption — so you digitise without overbuying. Use it before choosing software. For MIS use the Business MIS Dashboard tool.

Purpose of this tool & output

Pick software to run billing, stock and service

How the output is used

Use it to pick software to run billing, stock and service — the POS and inventory features that fit an electronics and service business.

Important cautions

Prioritise serial/IMEI billing, GST e-invoicing, service/job-card and attach-tracking; use off-the-shelf electronics-retail software rather than building. Pick for staff adoption — an unused system wastes money.

Companion documents

- Billing & Serial-Tracking System
- Business MIS Dashboard
